

Type III ANOVA of the F1 score

Contribution of each term to the total sum of squares (bars, left axis) and its significance (circles, right axis)

VC: Variant Caller; CEN: Center; MP: Mapper; TRM: Trimming; BQSR: Base Quality Score Recalibration. Terms with several abbreviations are interactions. Environment and duplicate handling are the 4 replicate runs of each cell (residual df 360, 3.4e-09 of the total sum of squares): every p-value is far below 1e-300 (D13).
